

Now.

Why are we doing this again?

Billy, for fuck sake-

What adult buries a fucking time capsule?

WE HAVE DEGREES! FROM COLLEGE!

FROM COLLEGE.

If you don't want to be here, just go back to the house, man.

He's just being a bitch.

Trust me, I have twenty one years experience being his sister.

Billy WANTS to be here.

Such a beautiful place...

Yeah, we should've come more... While we could.

What about over here?

It just feels right, y'know?

Alright.  
Picture time,  
right?

BEEP  
BEEP  
BEEP

So, who's going to help me dig?

Time capsule was your idea, Mr. History.

Grady, this is totally gay—

Angeles National Forest.

Shut the fuck up, Billy.

And don't use 'gay' fucking derisively.

Yeah, dumb-ass.

Dammit, Heidi—

He's not wrong. I mean, we're not twelve, man, a time capsule—

Daniel— We already talked about this. This is our last day together, and we're going to remember it so we can Big Chill it in like twenty years—

Except I don't wanna end up being Jeff Goldblum, Natasha—

What the hell?!

It's...metal. A big rusty piece of metal...

Not just my name... All of our names.

It's a door...

Uh...Why does it have your name on it?

Ugh. This is retarded.

It's not, Billy.

You're retarded.

I hate you.

And, don't say 'retarded!'

DANIEL ADAMSON

So this is, what? A prank?

NATASHA LOSI

I say we go in.

HEIDI RYDER

Seconded.

GRADY POTTS

Huh.

What the fuck? Where's my name?

What the hell is this?

Totally awesome?

So... Who's seen LOST?

I don't think there's a handsome Scottish dude listening to Mama Cass down there.

We can dream, though.

Okay, whatever. This isn't funny. And I don't like being the butt-

I don't think this is about you, Billy.

Yeah, right. You guys think you're so smart with your fucking bunker and-

SHUT THE FUCK UP, BILLY.

14 AME.

*Dear Grady,*

*This is your future.*

Fourteen years  
After Mass Extinction.

*I'm sorry.*

*It's unavoidable. It's fate  
and destiny and other pseudo  
religious words that are  
meaningless bullshit to you.*

*We read in the newsfeeds about  
genetically altered food and  
global warming, but, trust me.  
What ends the world is one very  
simple thing.*
